## Student Letter

I am Aron, an ambitious student living in central Europe in Hungary. We originally lived in a tiny region in the north and later my family and I moved to a city which changed my world view. USA has been a dream of mine since I was a little boy, I was always interested in the state where the culture is intertwined with its people.

Being imaginative and thinking creatively has been a part of my life since I was very little. It is something that I find joy in. It allows me to freely express myself. I am interested in the field of art, specifically photography and videography. Hanging out downtown with my friends and my camera during the weekends allows me to capture the beauty of my city and its people. I believe that art is engaged with society at large; doing photoshoots with my friends helps me to get rid of school stress. It reminds me that sometimes it is ok to slow down and to take in every moment one frame at a time. Apart from art, I find science very interesting. If I could have the chance to meet you, I would be as responsible and joyful as I am here. Moreover, I would like to deepen my international connections and have a better view at American educational ideology for my future career.

I find family and friends trust extremely important. I can proudly call some communities my family because we respect one another and are able to live with each other in harmony.
