Student Letter

Hello! My name is Muhammad. I have a lovely family with 3 brothers and 1 sister. My parents like other parents are very concerned for me. I am well-mannered and mature. I love discovering new places and cultures. I live in a city of gardens and historical places. I have visited many sites and food street in my city. These places are very beautiful and their architecture is also very beautiful. I want to study architecture in the future. I discovered the ancient architecture of my city that was constructed by Mughal architects of that time.

I have a good company of friends, because good company affects your personality. I love my friends. I hang out with my friends on weekends. I do several extra-curricular activities like playing games, cycling, and socializing because I am an extrovert person. I think I am kind-hearted because I believe that you can change a person's mind by your courteous behavior.

I am a food lover. I like having pizza and cinnamon roles, but I prefer homemade food because it is more healthier. I perform well in studies. In addition, I will also work more harder to achieve the best grades there. I think I can adjust myself efficiently with you. I don't care if you are rich or not. The thing that matters to me is love. If I am going to have pets then I will love them a lot. I want to gain experience of cross-culture and cross language. This is gonna cherish my life. Can't wait to see you.
