Student Letter

My name is Sumaiya. I am a girl of [15 yrs in 2019] living with my siblings. The activities that I enjoy doing with my sisters are cleaning the house and cooking in weekend. My interests are helping others, especially orphans; dancing, singing, and making ornaments. My friends are good-hearted people, respectful and work hard. I like to do discussion and other school activities with my friends.

My city is a peaceful place. It is one of the most attractive place per tourism. Most of people in my city live in Islamic tradition ways.

The future plan is to be a surgeon. I plan to employ myself in ornament business after that. The money that I will get in my business, I will use in building an orphanage and hospital. I really love to study learning new things and gaining new skills.

Things that I would like to gain in the US are about the culture and the history. I would like to know much about my house family and others that will be beneficial to me and the people surrounding me.
