Student Letter

Hello. I am Alberto. I am responsible and I respect what adults tell me because I consider it for my good. I am quite outgoing, I do not mind meeting and interacting with new people, and especially with other children. Although I don't have grandparents, I do have uncles and many cousins.

I love animals, especially dogs and cats. I have different hobbies such as music, because I have studied piano for eight years, and sports, specifically, tennis and ping pong, which I still practice, in addition to the judo that I practiced in its day. I reached the green belt. Another activity that I enjoy a lot is robotics classes. Last year, we programmed leed, robot fights and at the end of the year we set up a "Robert" from Mars that we later programmed. This year we are learning to assemble a 3D printer and design objects, and then print them. I also love to play video games with my brother or friends.

I am a very good student and I don't have any problem with any subject but I really like science specifically maths. Robotics has motivated me so I want to study computer engineering, industrial engineering or mechanical engineering. I'm really excited to the possibility of spending a school year with a family from the USA. I already had the opportunity to visit the USA with my family for a few days during a summer. We were in New York, Washington and Philadelphia. I loved the trip and we bought a lot of magnets to put in the fridge.
