## Student Letter

I'm Adriana, I'm a girl of 15 years old. I consider myself very nice and kind. I have a great relationship with my family. We love spending time together. I have a special relationship with my sister because we have always shared the room and we are always together. We make recipes, play sports, play board games... I like all type of food but know I'm trying to eat healthy food. My hobbies are watching films and series, my favourites are romantic and comedy. I also enjoy doing exercise and going to the countryside. I could say that what I like most is going shopping for clothes and all related with fashion. I love going to the beach and watch the sunrise and the sunset. I love the hot climate and I hate the cold winters because I like the sunlight. I love traveling to know new places and cultures. I like modern things and technology.

One of the reasons I want to go to the United States is because I have always wanted to fulfill my dream of living an American life; going to an American High School, eating American food, participate in different sports.. I would like to live all this experiences integrated in a family. Although I have travelled to different countries, I have never been outside Europe and I really want to know the United States and the American culture and American people with whom to keep in touch when I come back to Spain. Taking advantage of the fact that I want to improve my English, there is no better opportunity to go and live the experience.
