## Student Letter

My name is Alejandra, I'm 16 years old and I live in Spain. I play volleyball at my school, and I hope to continue playing in America. I also take piano lessons once a week. I love music, so I wanted to learn how to play. I am just a beginner, but I'm getting better at it every day! I love spending time with friends. In my free time I also like listening to music. My favorite music band is One Direction and my favorite singer is Taylor Swift. I also enjoy reading novels or fashion magazines and my fashion and art books I have at home. I also spend time watching movies or series and I like commenting them with my friends, I also like watching TV shows with my family like Friends.

I am very grateful that I was given this opportunity and I am very confident that I will give my best during this experience to success. I am looking forward learning about my host family and the culture there, living lots of experiences and also, I would love to travel in the USA to meet more new places of the United States with my host family. I think I would be a good exchange student to accept in your family because I love meeting new people, living new experiences, I am very interested in learning about a new culture and I'm looking forward growing as a person in this life changing experience. I am very grateful for being given this opportunity and I can't wait to live one year as an exchange student in the United States and to meet you to live this immersion experience with you.
