Student Letter

My name is Cemre and I'm fifteen. I terrificly enjoy hanging out with my friends. Before the quarantine we used to go to the cinema and shopping malls together. I really enjoy and spend most of my time singing, dancing, playing volleyball and skating. I have such a big passion inside me towards art. I can't describe the happiness and serenity it gives me to, sometimes draw with only music. I've always wanted to learn new things, as much as someone can learn, travel the world as much as someone can travel, last but not least read so many books as much as someone can read in order to become a more conscious and informed person about the world. I always had a different interest in United States. It is inevitable that it has to do with the movies and series I watched growing up. As long as I can remember I have always read the news or books about there from where I lived. The longer I read the longer I wanted to know more about the country. I wanted to see the place, I wanted to learn more about the lifestyle, food, cuisine, languages they speak, the culture. I'm really delighted to have the opportunity to get to know more about the country that I've been curious about. In conclusion with the bottom of my heart, I believe that with my exchange experience, I'll become a more conscious successful and mature girl who has had the opportunity to know and learn about the culture she has looked forward to know for years.
