Student Letter

My name is Leane and I am a seventeen-year-old French girl. The main reason I decided to do an exchange year abroad is because I dream of living in a foreign country when I'm older. In fact, I would like to study in the USA as soon as I graduate from high school and then leave there. My motivation for this exchange is to improve my English skills because as it is an international language, it is very important to be able to speak it properly as I must use it in my career.

I am a very serious student who is determined to succeed. I am perfectionist so I never give up, and work hard so as to achieve my goals. I am really concerned about getting good grades and succeeding in everything I do. I would say that my favorite subjects are English and maths. I often work with my best friend because we can really motivate and help each other with the homework. Besides, I am a caring and loving person. As a matter of fact, I care about my family and my friends. I want them to be happy and have a great life so they know that they can count on me if they have a problem. However, I am a little bit shy but I believe that this experience can make me more open and I am actually working on it.

I am interested in reading books in English, listening to music, watching series, hanging out with my friends, painting, taking photos and videos, and spending time with my family. I can't wait to meet you!
