## Student Letter

My name is Masa. I'm from Serbia. On weekends, I help with cooking, doing family chores around the house and raising my two younger brothers. I tried to teach him about the basic values that my parents taught me being respectful, humble and helping others. My family enjoys socializing, singing and dancing and we attend a lot of extended family events, we're all where we all dance and sing together, that's how my love for dancing and singing showed up. Exercise and staying fit and active are very important for my family. I stay active during the week by attending swimming, soccer, basketball and dance practice, as well as spending time outdoors with our friends and family. My long-term goal is to become a dentist and open my own practice. I would love to expand learning about different cultures and learn about similarities and differences among people from different countries and continents. America has been on my mind for a while. This program would allow me to not only learn about American culture, and everything that we consider as a culture, but also would offer me a window into the whole world as people from all continents can be found in the USA. Since I'm very open minded and talkative finding friends has never been a problem for me, I have no doubts that I will adapt very fast. That's why I'm looking forward to the opportunity to be a part of this program.
