Student Letter

Hey there! My name is Saksham and I'm a 15-year-old boy. I love travelling to the mountains, to colder places full of wonders that I have never seen before. I've always dreamt of travelling to different countries. My parents encourage me to try out new things and visit new places. Towards the end of 2019, I was part of a delegation from my school for a cross cultural trip to Hyderabad. This travel experience now made me even more excited about going to the US. I want to know more about the culture, history, and geography of the country which I've only seen on television before. I'm looking forward to meeting new people and making new friends with whom I can share stories about my experience back in India. I love singing Bollywood songs and I've participated in numerous competitions as well. I would love to learn singing western music and take up playing a musical instrument.

Mathematics and computer science are amongst my favorite subjects to study, and I want to secure a career in a STEM related field. I am also currently learning programming to achieve my career goals. I cycle about 30km a day. I'm excited to know more about the USA's policies, customs, and regulations so that I could think of advocating some of those to my school leaders or local administration to help make our surroundings better. I feel really grateful to you for being my host family. I'm looking forward to the whole experience of living with you. I'm looking forward to meeting you! Namaste.
