Student Letter

My family call me Faris, while my friends call me Salman. I am interested in drawing and designing things. I have a dream to go to the most favorite university in my country to study architecture. My biggest dream is to be an architect so I can help my family, my friends and others to design buildings, houses, parks, and other things. There are some activities that I and my friends like to do together, for example, bike riding, jogging, visiting interesting places around the town, and watching movies. With my school friends, we really like to discuss the school organization a lot, especially about making some programs to do at school.

I try hard to achieve my dream to be an architect by increasing my knowledge and also my behavior. For me, good knowledge and good behavior are not separable. I am an open-minded person who likes to make friends with people of different backgrounds and I do appreciate cultural and religious differences. By following this program, I would like to experience living in the US as a multicultural country with a host family, to learn different cultures, traditions, and make many friends. I will share all of these experiences to my friends in my hometown through virtual and face-to-face meetings. Surely, this program will benefit me and other people in my hometown.
