Student Letter

My name is Giulia and I'm a sixteen year old girl. I've got a strong and rather lively character. From the outside I can pose a bit tough but deep down I'm a very tender girl. I'm determined, stubborn, ambitious, brave. I always have a big smile on my face. Loyalty is very important to me. Making others laugh makes me happy and I strongly believe in laugh as cure for many ills. I read a lot of books, watch a lot of TV series and I like listening to music, in particular rap, hip-pop and pop music. I really like cooking and spending time with my friends, also the hairy ones on all fours. I love nature and have walks in the green and in the mountains, visiting new and breathless places and also those who tells a story or legend. I play softball and I work out in the gym. I love to try new things. I have decided to become an exchange student to improve my English, because I think the only way to know a language well is to be forced to speak it. The United States has always been the country where all your dreams come true and where you can be what you want. I'd like to experience the life of an American student, since in Italy everything is completely different. Finally, the USA is the homeland of my sport, which in my country isn't taken into much consideration. I'm looking forward to starting this amazing adventure with you and I'm sure we will spend a fantastic year together. I thank you for your cordiality and willingness to welcome me as one of the family.
