Student Letter

I go by Nadiya. You can translate it into English as Hope. I'm 15 years old. I'm a positive person. I try to share my optimism and positive attitude with others. I'm a hardworking, purposeful, and outgoing girl. I'm really happy if I do something good for other people, that is why I like being a volunteer during festivals or help peoples with disabilities. I live with mom, dad, and younger brother because my older brother studies in another city. I want to be a songwriter and producer. My other interests are dancing, ceramics, and sport orientation. I like ceramics because it helps me to relax and I can do some things for household. Sport orientation helps keep body fit and develop endurance a bit to make decisions quickly. Dancing is my second passion. I like it because while dancing I can show my feelings and emotions. I like reading books about life of famous peoples, real life stories, and other genres. I think well educated persons must read a lot. I read encyclopedias, where I can find lots of interesting facts about the world. I'm also interested in astrology. You can observe the light sky and find something interesting or enjoyable.

This exchange is a good opportunity to continue my self development, discover new talents, express my leader skills, learn English better and learn how to deal with some problems independently. It will give me an excellent and unforgettable background and experience, which it will be useful in my future life.
