Student Letter

My name is Sofia. I am 15 years old, and I'm from Spain. I live with my parents and my older brother. We all get along very well and I love them very much.

On a typical weekend, I read a book on Friday evenings, on Saturday, I usually meet my friends to go shopping, go to the cinema, or have a snack together. Then, on Sunday, I do the school homework, household chores, and spend time with my family.

I love listening to music and dancing on my own. I love chocolate and traveling with my family. And even better traveling with my family while I eat chocolate.

I also like theater and cinema. I don't like arguing, running, and broccoli.

My favorite subjects are the ones related to science like maths, biology, and physics.

That's why my career plan is to study biology. I would like to be a neurobiologist.

My mom, and her sister, my aunt, went to the USA for one school year when they were my age. They have told me their experiences and I want to have my own new experiences studying in the USA.

I'm sure that I will learn many things that I wouldn't learn staying home. I will mature, get emotionally stronger, and be more independent. At the same time, I will improve a foreign language and I will also meet new people that I'm sure will become friends with forever.
