## Student Letter

My name is Louise. My everyday life is pretty simple, I am going to school by feet or by bus because I live near my school. I like to go there, study and see my friends. When my day at school finished early I like to hang out with my friends because there is a parc just next to my school. During my free time, I have different hobbies: go shopping with my friends, go to the cinema, go for a walk, be with my friends, read, sing, draw and cook. I like being surrounded by my friends and meeting new persons. I am pretty sociable. I am enthusiastic and positive . I am determined and I like to go through my projects. In a group I'm kind of the leader, I like to lead the project but I always listen the advices and the opinions of the other's. I am also caring and friendly. I am always ready to help the others and I hate injustices. I like to learn about causes that affect me.

I would like to go to the United-States to discover new things like a new lifestyle, new relationships, a new culture and for sure to improve my English. Since a long time the USA attracts me. Thanks to the movies, tv-shows and books that made me discover this country and its culture that the wish of living there came. By this year of immersion, I see the realization of this big project but even more of a dream. I truly hope I will live an exchange by giving as much as I will have the chance to receive as well on a culture level than on a friendly or human.
