Student Letter

My name is Anna and in 2022 I will be seventeen. I am from the Czech Republic. I like sports. I have been skiing since I was able to walk. I did various activities at school for example dancing. I also have played handball. Then I do aerobic which I do since I was three years old. I really love it. It is something that makes me happy and when I exercise I don't think about anything else and I always clean my mind.

Besides handball and aerobic my favourite activity is painting on canvas. It isn't normal painting but I do dots to circle and from that I create mandalas. This activity is helping me with stress and anxiety. It is very calming.

With my best friends I can do whatever I want or tell them everything and they will always understand and be by my side. With my really good best friend that I even can call my sister we do everything. We see each other at least twice a week and we call every day. I like exploring city with her.

My family is quit big. I have two younger brothers and we all with our parents live in a flat with our cat. We are really active family. We love going on trips to visit some sights in our county or for some hiking trips.

I would like to improve my english level but I think that everyone wants that. I'm just very curios how is it in real life. Find some new friends is also on my list. I think it is very nice to have some friends abroad.
