Student Letter

I'm Clementine, I'm 15 years old, and I'm French.

I like to have time with my family: to play game, to go out, to go on vacation, to do shopping, to do activities together, to watch movies, to cook, with my mom particularly, to speak about our day and to laugh with them. I have a very good relationship with my mom especially at this moment. I know that I can talk to her when I feel badly we can share good moment together and laugh. With my sister, almost every day, we speak together about our day, especially the gossips haha!

I am empathic, sensitive, open-minded, I like to meet new people of my age (or not!). I find it very interesting and rich to discover new people, new way of thinking, to talk... I like joking and so make jokes and sometimes I can be a little determined haha! I like to talk about the world, news... or just have a conversation. I like a lot animals (except spiders and almost all insects...).

I would like to be an exchange student to discover the US: The culture, with celebrations, a different way of thinking or just to see the world, the different sports, activities, the food, with all specialities, to meet new people, new places, a new country, new landscapes, to learn English, to discover myself, just to discover a new way of life!

I know that it will be an incredible experience and I would like to do it so much!
