Student Letter

Hi, my name is Federico, I'm 17 years old, and I'm from Italy. I do not consider myself a model student but in recent years I have begun to study with more interest, obtaining results and small satisfactions.

Like so many boys my age, I really like soccer and playstation. I've been playing football since I was six years old and I enjoy playing football because it's a team game and I like to share my passions with my friends. I'm a fan of AC Milan, one of the biggest clubs in history and at least once a year I go to the stadium with my father.

In my free-time I usually play video games with my friends with which I go out during the weekend.

I love cinema, a passion that I share with my mother, I'm a huge fan of Marvel films.

I love my family, we are four: me, my sister, my dad and my mom.

My dad is an engineer and my mom is in charge of recruiting for an important IT company.

I want to continue my studies to become an engineer too.

I chose to be an exchange student because I have always been fascinated by the American school system, its culture and for the way they celebrate the holidays.

From this year I expect to improve my English, make new friendships and learn new things about American culture.
