Student Letter

Hi, my name is Tommaso: in Aramaic, it means “twin” and I really love my name because it isn't very common. I'm 16 years old and I live in a town in Italy.

My family is very numerous. I live with my parents, my sister and my two brothers. My father is a software engineer and a teacher. My mom is a teacher too.

I attend the scientific high school of my area, since I would like to become an astrophysical or a doctor. I like studying and I've never had any problem at school. My favourite subjects are physics, maths, science and, of course, English.

I think I'm quite active and in my free time I can't stay without doing anything. I love doing physical activities: the one that I like most is swimming.

I'm “addicted” to music! I can't live without it. My favorite genres of music are rock and hip hop, but I also like all 80's music.

On Saturdays or Sundays I usually go out with my friends. I have a lot of friends and I love spending time with them going to the cinema, dancing, chatting and playing various board games.

Last but not least, I love travelling and discovering new places and realities that are totally different from the ones I'm in everyday.
