## Student Letter

Hello, my name is Emilio, I'm 15 years old, and I am from Mexico. I consider myself calm, I like to draw, most of the time I am drawing in my iPad. I feel it like a way to express myself, I am really good making friends, at the moment I can be really shy but once I know the people I don't have any problems communicating with the people. I have a good relationship with my family, I do exercise with my mom, most of the time we go to the gym or to run. With my dad things are different, we go to the cinema and take out my dog for a walk. I really love them both and knowing the effort they are making to make possible this trip really makes me think about how much they are doing for me. With my grandparents, it's different because they were always with me when I needed them while my parents were working.

As I wrote at the beginning I love to draw, everything started while I was watching a video where the drawing combined with the animation really surprised me. I really like to read and collect manga comics and I like to play pokemon videogames and to play with my dog, I like to eat hamburgers and pizza, they are my favorite.

I want to go to the United States to improve my English skills, I want to expand my circle of friends, I want to explore new places from the united states and I want to have a great connection with my family in the United States, I want to show them my cultures and my traditions.
