Student Letter

My name is Maria Valentina, but I liked to be called Valentina. I am 15 years old, and I am from Mexico. I am so excited to lived this experience, and I hope everything ends as it was planned. When I saw that my brother lived this experience, the improvement he got with the language, all the friendships he made, the opportunities he got after etc., it made me want to live something like that.

Moving on, I am going to tell you a little bit about me. I am a girl that likes sports a lot, one of the things I enjoy specifically with my father and my brother is to watch sports together and talk about it. I think because I am the only girl in my family, they have taught me that love and passion they have to the sports specifically with soccer. I love spending time with my family and friends. I consider myself a very sociable person, who is very easy to make friends. I like to make excursions with my friends to different places we don't know in our state and surroundings.

I expect from this experience to grow up as a person, to improve my english, to make a lot of friendships, to visit and explore places there, but mainly to make a really good and close relationship with my host family, because I think that kind of bonds remain forever. As well as want to demonstrate to myself that I can be independent, and also to learn my host family and I each other our cultures and traditions. I believe that we all can enjoy this unique opportunity and make it unforgettable.
