Student Letter

Hello, my name is Callista, I am 15 years old and I am from France. Since I was a little girl, I have loved to read and I wanted to read the books I loved in their original version, the English editions are often much nicer! So I turned to English by reading.

If I were to say more about myself personally, I am very passionate about everything related to the world of books, I even considered becoming an editor later. It's something that comes naturally to me, for example in public transport I read a lot. I read 200 books in 2021 (including comics and manga of course!) I keep an Instagram account of reading that I hope to continue there, I could for example discover by the same opportunity the landscape through my photos to my French community!!! It's something I'm so passionate about! I also do reading challenges and I like this very social side while reading is a passion that is "practiced" alone. I also practice ballet which I would like to include in the US or at least take up a sport like cheerleading which interests me a lot!

During this year in the US I hope to become even more fluent in English! But I also hope to discover a new culture and get over the clichés and stereotypes! I would like to come back changed from this rich experience and come out a better person. I hope that the family that will host me will also have this perspective and will want to take me along on their outings to travel, discover and learn more!
