Student Letter

Hi, I'm Omar, I am 15 years old and I'm from Palestine.

My father works as a vet while my mother is housewife. We enjoy spending time together. We do things like watching movies / TV series together, playing board games, and the thing that we enjoy the most together is to go in the car and just drive around the city.

I have two types of friends. Schoolmates, we talk about school stuff. The other kind of friends, the kind I know from outside the school we talk about things that happens with us and about life in general. We usually talk on the phone but sometimes we meet and walk around the city. I go out and study with both types. I love to spend time with my family and friends but I need some "me time" in my day. That's when I relax a bit in my room, usually this will be at night.

I'm interested in science in general and especially biology. I really like taxidermy and exploring the local wild life. In the future I hope to study abroad, study zoology to become a vet like my father.

I want to come to the U.S. because I want to learn about new places and different customs and traditions. I also want to be a good representative for my culture and to let people know about my part of the world. Not to forget this experience will build my personality and prepare me for university.
