Student Letter

I'm Laura I'm almost 17 years old, I live with both of my parents, my mother is a speech therapist and my father is a head hunter, I have an older brother named Nicolas that studies so he doesn't live with us but we still near.

Full of humor and sarcasm, I may seem a little reserved but I'm curious to learn from people, from their experiences, I like to listen to them and support them. I live in music and I listen to all sorts of it (classical; rap; indie; hip-hop) I used to play flute for 4 years but I stopped when I entered "college" (the equivalent of middle school). Since I'm 6 years old I practiced dance, I experimented with Classical, Contemporain, modern-jazz, and jazz but I had to stop because of my high school's schedule, I kinda miss it. I love to go out with my friends, go to parties with them. I love reading (dramatic, detective story), I recently started to read in English. I have always been interested to learn more about other cultures, especially languages, I recently started to learn Japanese (which is extremely difficult but so exciting) and discover a passion for Greek mythology. Thanks to my parents, I traveled a lot, each destination has always represented very enriching experiences. Later, I would like to work in the area of international relations- diplomacy to use languages and travel around the world.
