Student Letter

My name is Malik and I'm 16 years old, a brother of 3 siblings. We live in the same house with lovely parents, my father Adel who works as an Accountant, my mother Hamida who works as a Teacher. We always do everything together, we enjoy our free time by doing various activities such as going on vacations, going on hikes, and road trips which strengthen our bond.

I have made great relationships in my hometown, I made a lot of friends that share the same interests with me such as football, scouting, reading books and they were always proactive when it comes to motivating me towards volunteering to helping community organizations.

I'm an active person. I always spend my time on useful things such as reading books, sports especially football and baseball. And I'm planning to join reading clubs and sports teams in the U.S.

I love technology and science, and I'm willing to learn more about them by joining science and technology clubs in the U.S which will improve my skills and help me in my career path.

With no doubt, I'll spend a great time and I'll have an unforgettable year in the U.S with you. I can't wait to meet you and to start our journey together!
