## Student Letter

My name is Lluisa and I am 15 years old. I am a bit shy when I don't know the person, but when I become confident, I become a very outgoing person. I like to help other people when they need it, that's why I consider myself a generous person. I am very empathic.

I like spending time with my cousins and toddlers because they have a lot of imagination and the games they make up are fun. And of course, I love playing with my sister. I like to listen to music when I read a book or do my homework. I love music and reading. I don't like to stay for a long time without doing anything, it's a bit boring so I try to keep myself busy.

When I finish high school, I want to study criminology, or something related to science, like molecular biology or forensics.

I want to be an exchange student because it is an unforgettable experience and I can learn more English, get to know different cultures and meet new people who can help me adapt there. I hope to gain confidence and improve my English.

My whole family shares a love for sports like basketball. The obsession with basketball began when my mom and dad started playing it when they were teenagers and then they tried to include their passion and then they tried to include their passion for this sport into our family activities.
