## Student Letter

My name is Sadiya and I am fifteen years old, I am a high school student. Like any high school student, I like to go out with friends, play football with them at school breaks, I like to chat sincerely, and I also like long trips with my family. And I also consider myself as a chef of our family, as I love to cook for my friends, relatives, and parents. My favorite lessons at school are physics, chemistry, English, mathematics.. to be honest, I don't have such lessons that I don't like.

Also I am a very positive person, I like to fool around with people close to me.

About my family, I lost my father when I was a baby, and therefore the closest person for me was my mother, she replaced both my father and mother, she worked day and night for us. All my life I studied in the best private schools, I was no worse than those children who have both a father and a mother. I am very grateful to her. And also I have one brother, he is one and a half years older than me, despite the fact that we can fight like Tom and Jerry, I still love him very much, when he is with me I feel myself protected, and as he says he will tear anyone if someone harms me. We are a very friendly family, we love to support each other.

Also things that I'd like to add, about my dreams. One of my goals was to become an exchange student and learn new cultures, traditions, mentality. Meet new people and provide them with information about our country.
