Student Letter

My name is Dzenisa. Yes, a bit difficult to pronounce, it's similar to Jenny but with-sa at the end. I live with my mom and younger sister in a cute little house. We have a great communication and share the same humor. All three of us are busy with school or work and that made us all adapt to each other's schedules. That means we take up a responsibility that we have time for. For example, mom usually cooks but if she's at work, I do it myself and that goes for every other house chore.

I come from a small unique town in Bosnia and I live very close to the centre of it. Even though it's not a big city I find myself busy in all sort of activities such as: school-related projects and presentations, charities and my favourite occupation, sports. Mainly volleyball, that I look forward playing in America.

Other than Volleyball I like reading, traveling, art, dance, music, politics, cars and list goes on... I'm very opened to all sort of things and challenges, and that is why I want to learn more about other cultures and lifestyles.

Now, for my future I don't have exact plans and people often assume I will pursue social studies, and I see why they might think that, but I'm very interested in maths, physics and computer science. With this program I could learn right terms and other english words I'm not familiar with, that I could use later in future.
