Student Letter

Hello, my name is Alberto and I am going to tell you how I am. First, I'm a guy who has a lot of friends but I'm not very extroverted. I am very cheerful in general, I have a lot of confidence and I show it, for example, playing basketball on the court and I am a little impatient. The food I like the most is pasta in general but I usually eat everything in my day-to-day life.

I like sports in general but the one I like the most is basketball, I've been playing since I was eight years old and I think I will never get tired because every time I play I discover new things that make me want to play the next time, I also like other sports like soccer, paddle or tennis but the one I play competitively is basketball and my priority is that, playing basketball.

With my family some weekends we go to the countryside for an excursion or sometimes we go with friends to eat or for a tour as well, to see the nature and the animals and play outdoors, the truth is that we all have a great time together.

I want to get to know new experiences and cultures and get out of my comfort zone, and last but not least, I want to improve my English and try to have conversations with native speakers.

I hope to make new friends from all over the world and learn from them, to meet a new family, and not to lose contact with any of them.
