## Student Letter

My name is Victoire but everyone calls me Vic. I am 16 years old and soon 17 years old on April 12th. One of my most beautiful trips was to NYC last year in April and since then my dream was to come and live there and learn how to live in an American family like we can see in movies or even on social networks. I talked about it with my mom, with whom I am very close, and with a little thought and negotiation she said YES and that it would be beneficial for my higher education business studies, on the one hand for the experience and on the other to speak fluent English. I did a lot of artistic gymnastics and it was one of my biggest passions but I had to stop. I have also done 7 years of tennis, 3 years of RG, 2 years of ice skating and most importantly I have been skiing since I was 3 years old and it is one of my greatest passions. I am a very positive person, in the exchange and communication, I am easy to live with whether in the choice of activities, outings or even in the food. I love vegetables and fruits, I eat them almost at every meal but I also love pizza and especially Coke. I also love to travel, visit museums, go for walks and discover new cultures, new people and to exchange, this is also what pushed me to want to go as an exchange student and more specifically to come to the United States. This experience will allow me to meet different people, to live in a new city, to discover a new society and especially a new family.
