## Student Letter

I'm Giulia, I'm 15 and I live in a small town where I get on very well, I'm a fairly good student, I don't like studying but I know it's important so I do it, I really like reading, whether it's poetry, romantic or horror books. I like playing sports, since I was a little girl I started playing soccer, swimming and much more, now I practice volleyball and sometimes, usually on Sundays, if we have nothing to do we go climbing. I have been to Trentino three times to ski where I also won a youth competition. I'm not an easy person to understand because I tend to withdraw a little into myself, but when people get to know me for who I am they usually don't regret it, I'm always afraid to know what people think of me but despite I'm a nice and kind girl, I care a lot about the people who are close to me and I'm not a very affectionate person except towards certain people. I've never been very good at making friends and sometimes I've been disappointed by who I really considered an important part of me but this is life, these things happen and you always have to move forward and that's what I did. Volleyball is helping me particularly a lot in this period, in fact since I started practicing this sport I have found true friendships that I know will never abandon me and it is the best thing that has ever happened to me. I'm not able to trust people immediately, it takes me some time and I think this is an advantage.
