Student Letter

My name is Anna. I'm a 16 years old girl from Italy and I live in a really small town. Here I live in a quite big house with my dad, who is a carpenter, and my mom, that works in a hospice. I also have a sister, Rita, who is 8 years older than me and that doesn't live with us anymore because of university: she moved out the first time 6 years ago and then 2 years ago she moved to Germany where she is now studying for her university specialization in biomedical engineering. So I'm used to have people that I care about far away from me for extended periods of time, and I don't think I will have a lot of problems with that during my year in the US. I am an outgoing person: in my free time I like hanging out with my friends in the city, or just walking in the nature, and I absolutely love experiencing new things, seeing a lot of new places and traveling. In fact, I already visited several places! I've been to London for a study vacancy of two weeks where I took an English course, to Milan with my sister to see a concert, to Rome and Naples with my friends and to Liguria, where I spent one whole month living with my aunt and my uncle during summer. I look forward to add a lot of new places to my list in the next years!

Still, I also like moments of relax at home, such as watching movies, tv series or listening to music, in company or by myself.
