## Student Letter

I would like to tell you a little about my interests., which I would possibly like to develop further at school in the US, or which I would like to start. I've been interested in architecture and interior design for a while now, so far I haven't developed this passion professionally, but sometimes I try to create something on my own. I also have a keen interest in politics and social sciences, these types of topics expand my worldview and therefore I like to develop them. It is also worth mentioning that from an early age I was raised in a family that simply listened to a lot of music, which turned into my other passion, which is listening to music. Doing this simply gives me pleasure. It is possible that I would like to start learning to play an instrument, such as the guitar, but for this time, I haven't developed this goal yet. The last interest I'd like to mention is mathematics, it's more my favorite subject, but I'm listing it here as my passion anyway.

I would like to talk briefly more about my passion for traveling and learning about new cultures. The first time I went on a foreign vacation was when I was nine months old, and so far I have visited as many as seventeen countries. This includes the US, whose culture I simply fell in love with. Among other things, that's why I'd like to learn about life in the States from the inside, because the one we can experience on vacation is certainly significantly different from everyday reality.
