Student Letter

My favorite things in life are: Music, theatre and marvel. Marvel movies really inspire me, it may be because a world with people that actually do care about others without even asking for money to do their job sounds fantastic. Of course, one of my favorite characters is Spider-man. I also like art. When you see a painting with someone else and you try to understand what the painter was trying to explain through shapes is one of the best moments in someone's day. The feelings that you can with just a picture is amazing, and I happen to love feeling things, that's why I'm an actress, or at least hope to be one someday. Acting is the only moment where I can stop worrying about literally everything and just focus on doing what I love most. I don't like to shut my thoughts so when I have an opinion, I usually say it. I'm logical, a little bit cold and reserved at the beginning, creative, intelligent, sensible, I pay attention to my surroundings, persistent, stubborn and ambitious, that's why I belong to the Slytherin house. I'm a big Harry Potter fan, I watched all the movies and I'm currently reading the books. That's another thing I like, books. Whenever I earn some pocket money I go to the closest bookstore and get lost in the stories, usually fantasy but I do enjoy a good romance book. Hanging out with my friends really helps me with stress. They are the absolute best and I would give everything for them.
