Student Letter

My name is Paula, I am 16 years old and I am from Spain. First of all, I'm going to talk a little about myself and how I am. I am a person who finds it difficult to open up to others and meet people, but once I gain confidence I am a very friendly girl. I am a very responsible person who wants to live this experience to the fullest. I am a perfectionist in everything I do, both in studies and in sport. I've been playing golf for two years, since then I've improved a lot and I want to keep doing it. I like to play golf with my family and I also like to play with my team and train together. Another of my hobbies is to spend time with my friends watching movies, going shopping, walking around the city or just talking about our things.

On the other side I want you to know that I am so excited to start this amazing experience although I am a little scared. I think that, at the beginning, it will be very hard to me to adapt but I am sure that in a short time I will begin to feel comfortable both with my family and with my classmates. For a long time I had thought about going to study for a year in the United States as an exchange student, it has always seemed like a very different experience that will bring me many positive things. My father lived the same experience that I am going to live in a few months and he always says that going there was one of the best decisions of his life.
