## Student Letter

My name is Max I'm 15 years old. Later, I think I'll follow my school career with a diploma to learn to manage a little or a medium corporate business. To complete my studies I will follow a cooking diploma too. Indeed, later, I want to take over my catering family company. Take over this company it's really my dream and I want to improve it, give it new ideas that I already have. Today I just help my father within. I wash dishes, bring order... With my father we talk about services provided, their quality, their beauty... Because his services provided are more than just cooking. He organizes the whole event with decoration, projectors, music... and I really love it. In fact his services are high-end, often for the most wealthy, like companies, their CEO, stars or for a duc for example. He already worked internationally with sport competitions but his English is very bad and it's difficult for him to communicate. I won't have the same difficulties than him later. Moreover I'd like to develop the family company internationally.

I'm more outgoing than shy. I like human contact. I'm a volunteer in my city's library every Saturday morning and in the hockey club of the same city where I study, when it's match day. Last year I was a volunteer in an environmental organisation but I stop this year because it took me too much time to prepare activities and interventions at home. I really like those activities it let me knowing new people
