No / None

**Religion:**

Hindi

## Student Letter

Hey..my name is Akhil. I am sixteen years old. My hobbies are tasting new food, exploring new places and reading books to use my time in better way to enhance my knowledge. If you ask about my characteristics I think I am happy, amenable and confident. My plan is to sincerely pursue my education. I live in a nuclear family consisting of 4 members, my mother, my sister and my father. My father is a business man. He is running showroom of electronics appliances from past 30 years. My mother is teacher for last 20 years. She teaches Punjabi language subject. I get an opportunity to do my studies from America. In this letter I am going to tell about myself. Firstly, I am going to the United States of America for my education. I selected the United States of America for my studies because of better education system. Moreover, Indian education system focus more on the theoretical and less on practical. Furthermore, I am that type of person who is flexible in nature means I can easily adjust in every environment. I am very determined, self-confident and so I hardly give up. I think I can be a good friend and a good son, helping you whenever you need a hand, and hoping you will do same with me. I don't like to cause problems to others, so I am really calm and obedient boy. Moreover, I love to play badminton and cricket in my free time as these are my favorite sports and games.
