## Student Letter

My name is Tan, and I am thrilled to have the opportunity to be an exchange student in the USA and to be a part of your family. I come from a family of doctors; my mother is a Neurology Professor, while my father is a psychiatrist. Growing up, I was exposed to science and medicine, which developed my interest and passion for these fields. I hope to become a doctor someday and continue the family legacy. However, I also understand the importance of being well-rounded and exploring other areas of interest. In addition to science, I have been exploring various other hobbies and interests. One of my favorite hobbies is fitness. I enjoy working out and eating healthy to maintain my physical condition. It helps me stay focused, healthy, and motivated. I enjoy listening to music, but I prefer to share it with other people while doing something together, like working out or cooking. I am excited to be an exchange student in the USA and to be exposed to a different culture and environment. It will be a challenging yet fulfilling experience. I am excited to learn and grow from this experience, and I believe it will help me become a better person. I believe experiencing different cultures and religions can be an enriching experience, and I am open to learning about new things. I am also looking forward to trying new foods and exploring different places. I understand that living with a host family can be a challenging experience, but I am excited about it.
