Student Letter

My name is Yokutkhon. Me and my family enjoy cooking and cycling together. I am the one responsible for doing almost all the chores, however, me and my sister take turns doing them. I have a wide range of interests, including, cycling, reading, chemistry, and painting. Reading has become a habit for me and chemistry, for me is the most interesting subject so I'm really keen on it. I would also love to travel and explore new places, which is one of the reasons I am so excited about the opportunity to come to the U.S. for an exchange program. I have lots of friends from different backgrounds, places and nationalities. In the future, I want to become a doctor or a chemical engineer. After graduating from uni I want to open my own clinic and treat people with cancer, if they aren't financially capable of affording it I want to be able to treat them for free. If I will be a chemical engineer I want to experiment and manufacture chemical products to help make people's life easier. Uzbekistan is a wonderful place not like what the media shows and there are people who accomplished many great things are from here. About my personality, I am a bit of an introvert so I can be awkward at first but I hope as soon I get to know them better we will get along well. I would gladly join their family traditions road trips and so on. I would like them to know them I am really keen to learn about the American culture, make everlasting friendships and of course improve my English skills.
